2. cPanel / Deployment
3. Hostinger
4. HostGator
5. Plesk
6. Razorpay Payment Gateway Integration
7. SMT
8. Corn Job
9. Email send

Work Experience:

Satyakabir E Solution PVT LTD Bhopal

PHP Laravel Developer

I worked on a variety of in-house and client projects, focusing on building and maintaining robust applications. I developed secure authentication systems, including OTP-based login models, and worked extensively with MySQL databases, optimizing queries and structures to ensure performance and scalability. My experience spans across e-commerce platforms where I managed product catalogs, order processing, and integrated payment gateways. Additionally, I developed and integrated RESTful APIs to ensure smooth data exchange with third-party services. I collaborated with cross-functional teams, including designers and project managers, to deliver high-quality solutions.

I worked on live projects involving both front-end and back-end development, creating websites from scratch, modifying templates, and connecting front-end to back-end for data handling and CRUD operations. I integrated PHP mailers and created landing pages as required. Additionally, I attended

sessions on technologies like Laravel, Flutter, Cloud Computing, and Microsoft

Project Details:

1. Online Car Booking & Fleet Management Platform

Domain:- <https://testing.orbosistrends.com/>

Worked on: Backend | **Technology:** PHP Laravel, RESTful APIs and MySQL

To build a complete digital platform where customers can browse available cars, check prices, select rental duration, and complete bookings online, while the admin manages fleet, pricing, bookings, availability, and customer details. The goal is to automate the entire rental workflow and provide a seamless, user friendly, and fully responsive booking experience.

2.primeurbanservices

Domain: <https://primeurbanservices.com/>

Worked on: Full-Stack | **Technology:** HTML, CSS (Bootstrap), PHP Laravel, RESTful APIs and MySQL

Developed a comprehensive Online Legal Advisor website that connects users with certified professionals for various legal and financial services. Created APIs and a Laravel based dashboard for managing user requests and professional assignments. Users can submit requests for services and work. Admin have the ability to assign tasks to the registered professionals, monitor work progress and track submission deadlines. The platform provides seamless workflow management, ensuring efficient task delegation and service fulfillment.
